- Working part-time in a fast-paced customer-facing environment while studying full time.
- Delivering high-quality customer service and handling daily interactions with diverse cultures.
- Demonstrating strong communication skills, adaptability, and time management.
- Gaining hands-on experience within the Irish work environment and professional culture.

PROJECTS

VenueFlow – Final Year Project

- Designed the end-to-end UX for a hospitality booking and operations platform used to manage reservations, seating plans and customer experiences.
- Conducted user research through stakeholder interviews and workflow analysis to identify operational pain points.
- Created user personas, customer journeys, user flows, wireframes and high-fidelity prototypes in Figma.
- Collaborated using Agile methodologies to define functional requirements and improve usability.
- Designed a responsive interface focused on accessibility, efficiency and user-centred design.
- Developed using React, Node.js and MySQL.
- Integrated UX principles with technical implementation to bridge design and development.
- **I identified real problems in a business where I work every day and designed a solution to resolve them.**
